ABOUT ME

I am a software developer who has found my passion in coding, especially in back-end development. Formerly a strength/sports performance coach, I have found the constant learning and challenge of software development so invigorating. Problem solving is something I have always enjoyed and being able to collaborate with other developers is very enjoyable. I am excited for my next opportunity and all that awaits me with it!

FULL STACK PROJECTS

Kiss The Cook

<https://kiss-the-cook.herokuapp.com/>

Technologies used: Javascript, MySQL2, Sequelize, Express, NodeJS, Handlebars

- A social media-esque app for creating, sharing and viewing recipes
- Built forms, handlebars, collaborated on RESTful API back-end

Trip Split

<https://trip-split-atoz.herokuapp.com/>

Technologies used: Javascript, MongoDB, Mongoose, React, Express, GraphQL

- An application which allows users to create and join trips, keeps track of trip expenses, and splits the cost between the members at the end of the trip
- Led back-end team in developing models, tracking and querying for data. Assisted with React components data display logic.

WORK EXPERIENCE

Manager/Trainer

Anytime Fitness

- Gained valuable sales experience, grew social capacity, became more adept at handling difficult situations professionally, made connections and friends
- Increased sales significantly, brought in training revenue, helped business become profitable again
- November 2020-November 2021

Resident Director

Worldview at the Abbey Gap Year

- Organized extracurricular activities, taught weightlifting and fitness classes, led outdoor excursions (hiking, camping, trail running, rafting, rock climbing).
- Directed dorm activities and policies. Mentored and tutored.
- August 2019-November 2020
